Use with textbook pages 260-265.

## Dense, denser, densest

Complete and label the diagrams according to the instructions below.

1. The table below lists the densities of five different fluids. If the fluids were added to a beaker, how would they be layered? Draw and label the layers in the beaker below.

| Substance | Density (g/mL) |
| :--- | :--- |
| gasoline | 0.69 |
| glycerol | 1.26 |
| corn syrup | 1.40 |
| vegetable oil | 0.92 |
| rubbing alcohol | 0.79 |

2. Water has a density of $1.00 \mathrm{~g} / \mathrm{mL}$. Draw and label each of the following objects in the tank of water. Show whether they will sink or float.

| Object | Density |
| :--- | :--- |
| cork | $0.24 \mathrm{~g} / \mathrm{cm}^{3}$ |
| ice | $0.92 \mathrm{~g} / \mathrm{cm}^{3}$ |
| gold ring | $19.32 \mathrm{~g} / \mathrm{cm}^{3}$ |
| block of wood | $0.66 \mathrm{~g} / \mathrm{cm}^{3}$ |
| marble | $2.5 \mathrm{~g} / \mathrm{cm}^{3}$ |
